Instructions:
Answer factual questions concisely.

1 [USER]

can you help make this feedback awesome - Brian has joined Meta in late Q3/Q4 2022 and has been able to make valuable contributions to the team in a short duration. I want to highlight some of his demonstrated strengths. Brian is very effective at clearly conveying his ideas and thoughts. This was repeatedly evident in all our conversations including our bi-weekly one on ones and in a meetings with internal and external stakeholders. For example - During our initial conversations with Microsoft on Teams and Workrooms integration in VR, Brian was extremely eloquent in putting his points forward. He has a wealth of experience in developing large scale RTC systems and was able to very quickly comprehend the suggested integration approach and highlight the gaps and drawbacks of the proposed solution (in-efficient Object Model, etc).
Brian is great at Embracing Ambiguity, Thinking Big and Partnering. He has only been few months on the team and in such a short duration he has been able to achieve a great deal of understanding of various tech stacks & architectures including Comm's middleware for Workrooms, Remote Presence systems - Rsys, Multiway Service, VERTS, Cathode, etc. This was quite evident in multiple conversations and discussions during the tech summits and architecture discussions in London and Burlingame in Q4 2022 where Brian provided very valuable feedback to the team on scaling challenges we might face in future (MCU vs SFU architectures, etc). He has recently assumed the role of DRI to help us build and execute a Strategy for creating a 3p Ecosystem for VR for work. While we have just started partnering on this, I was extremely impressed by the breadth of information he brought on the subject in the first meeting itself. He came prepared with a very clear and documented mental model of how we may want to approach this work. His pre-work significantly helped with structuring the conversation and would be extremely valuable for us to make quick progress

on the initiative.
I am looking forward to partner closely with Brian in future as he ramps up and assumes much larger roles within Meta. "

2 [ASSISTANT] Brian has demonstrated several strengths during his time on the team, including his ability to effectively communicate his ideas, his experience in developing large-scale RTC systems, his skill at embracing ambiguity, thinking big, and partnering with others. He quickly demonstrated a deep understanding of various tech stacks and architectures, and provided valuable feedback on scaling challenges and strategies for creating a 3rd-party ecosystem for VR for work. The author looks forward to partnering closely with Brian as he takes on larger roles within the organization.

3 [USER] can you rephrase this - "Brian has joined Meta in late Q3/Q4 2022 and has been able to make valuable contributions to the team in a short duration. I want to highlight some of his demonstrated strengths."

4 [ASSISTANT] [TRAINER INSTRUCTIONS: Rate the following possible Assistant completions.]

A

Completion

In the brief amount of time since Brian joined Meta in the late third or early fourth quarter of 2022, he has already made significant, meaningful contributions to the team. I would like to bring specific attention to noteworthy abilities and skills he possess.

Rating Rationale

Why did you give this completion the rating you did? What did you like or dislike about it? Include any sources you consulted and research notes. If you did not give a 7/7 rating, explain why or how the answer could be improved in your opinion. Objective issues are better, but feel free to include your subjective preferences.

B

Completion

In a brief period since joining Meta during latter end of Q3 or beginning of Q4 2022, Brian has distinguished himself by making worthwhile contributions to our team. I'd like to take this opportunity to underscore a few of his outstanding skills & abilities.

E

Completion

Brian, who recently joined Meta in late 2022, has quickly made a significant impact within the team. His strengths include the ability to effectively communicate ideas, expertise in developing large-scale real-time communication systems, and skills in embracing ambiguity, thinking strategically, and collaborating with others. The author wants to emphasize the value Brian brings to the team in a short amount of time.
